

## FedMall

### MarketPlace:

#### Expanded to Allow Additional Products!

FedMall MarketPlace allows suppliers to upload catalogs for supplies quickly and easily. The original phase of MarketPlace focused on office supplies but now allows a greater variety of supplies (more NAICS) to be offered to federal customers.

Suppliers use a streamlined application process; when approved, they can post items on MarketPlace for purchase card holders to buy at or below the micro-purchase threshold. This exposes DoD customers to open market products at a convenient Government website.

Buyers can find these items using the search term "MarketPlace". They are also displayed in a regular search on FedMall. Suppliers use FedMall's Supplier Portal to upload their catalogs. Self-help guides can be found at <https://fedmall.mil/index.html>.

### FedMall is:

**Designed to be user friendly, intuitive, and most importantly, to meet current individual agency needs. FedMall assists purchase card holders to find your products more easily with:**

- Enhanced search function; allowing users to find products quickly and easily
- The ability to compare similar products sold within the system
- Improved purchase tracking

**Specializing in provisions for government agencies, FedMall offers:**

- Exclusive access to the Department of Defense, federal, state and local agencies who shop for and buy goods
- Support for veteran-owned businesses, small businesses, Ability One and companies that sell environmentally friendly products
