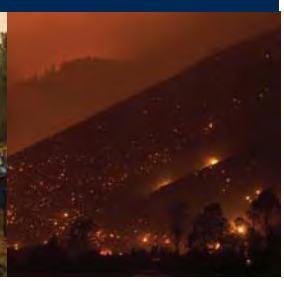
About This Catalog

This Wildland Fire Equipment Catalog is the basic supply publication for use by the U.S. Forest Service (USFS), Bureau of Land Management (BLM), Bureau of Indian Affairs (BIA), U.S. Fish & Wildlife Service (USF&WS), National Park Service (NPS), State and Local governments, and other Forest Service–sponsored participants in the government-wide wildland firefighting effort.

This catalog contains descriptions and ordering data for wildland fire protection equipment and supplies managed by DLA. Each item is indexed alphabetically by name and numerically by National Stock Number (NSN) and National Fire Equipment System (NFES) number.

Your suggestions for improving this catalog are invited at all times. Items will be deleted or added as needed, provided they meet the criteria established by DLA, USFS and BLM. Questions or comments should be directed to the DLA WFPP email address at DLAWFPP@dla.mil



Specification References

The specifications cited in catalog descriptions may undergo a series of revisions (indicated by successive suffix letters) to keep current with industry changes and agency needs. Because it is not feasible to show the latest revision on the catalog publication date, only the basic specification is referenced in this catalog. Although NSN items are always procured under the latest edition of a specification in effect at the time of procurement, on-hand stock that was procured under a previous edition of a specification will be issued until the supply is depleted.

The National Stock Number

The National Stock Number (NSN) is used for requisitioning, new procurements, existing contracts, shipments, shippers' invoices, payments, cataloging, stock records, etc. Accordingly, the items in this catalog are identified by 13-digit NSNs. To obtain items in this catalog, please visit https://www.fedmall.mil/ or call 1-877-DLA-CALL (352-2255).

About This Catalog

Water-Handling Accessories

- Unless otherwise noted, the working pressure of all items under this heading is 600 psi.
- All flow rates are at 100 psi flowing pressure.
- ¾" connections in this catalog use GHT (Garden Hose Thread) threads and 11-1/2 NH threads interchangeably; both designations are the same threads.
- This catalog includes some threads that are specific to the USDA Forest Service and do not follow the NFPA standard. We indicate the threads used on each item.
- The National Fire Protection Association (NFPA) standard calls for ¾" and larger connections to be NH (national standard) threads. The wildland agencies have adopted this, except for ¾" and 1" connections. The ¾" connections shall be ¾" 11-1/2 NH (rather than the NFPA standard of ¾" 7.5 to 8 NH), and 1" shall be NPSH (straight pipe) thread.
- All female connections come with gaskets in place.
- All aluminum-threaded items are hard-coated for durability.

Large New-Generation Fire Shelter

(Taken from TechTips 0551-2325-MTDC, June 2005)

	Regular Fire Shelter (inches)	Larger Fire Shelter (inches)
Length:	86"	96"
Height:	15-1/2"	19-1/2"
Width:	31"	33"
Packed Size:	8-1/2 x 5-1/2 x 4"	9 x 5-1/2 x 4"

How Does the Large Shelter Differ from the Regular Shelter?

The large shelter is longer, wider and taller than the regular shelter and weighs about 0.6 lbs. more. The table above shows the dimensions of both shelters. The large version is recommended for firefighters who are taller than 6'1" or whose girth is larger than 53". Firefighters shorter than 5'7" may have difficulty deploying and holding the large shelter down. The large shelter is easily identified by "LARGE" stenciled on the quickdeployment strap. The large shelter's deployment strap is orange rather than yellow, the color of the strap on the regular shelter.

Requisitioning from the Defense Logistics Agency (DLA)

Prior to purchasing items from the Department of Defense (DoD) Defense Logistics Agency (DLA) Wildland Fire Protection Program, program users are required to have an account in the DOD ordering platform known as FedMall. To access FedMall, program users are also required to have a valid Activity Address Code (AAC) and a security credential (common access card / USDA LINKPASS / BLM equivalent / Smart Card) or external certificate authority (ECA) token.

Federal Customers

Ordering instructions for Federal customers, both National Cache and non-cache Federal customers can be found on the FedMall home page at https://www.fedmall.mil.

State and Local Customers

Keeping in compliance with Federal law, State and Local government customers are required to pay in advance for materials ordered from DLA. DoD FedMall orders placed in support of firefighting missions are required to be paid for with a credit card at the time the order is placed.

The authorized AAC for State and Local government customers begins with a "3B". The "3B" AAC is mandated for use as it enables DLA to meet auditing requirements. State and Local government customers failing to adhere to the "3B" AAC requirement will be suspended from the program.

To obtain a "3B" AAC to participate in the program, contact the State and Local Program Manager @ DLAWFPP@DLA.MIL.

DLA Customer Interaction Center

DLA's Customer Interaction Center (CIC) is DLA's 24/7 Help Desk. Customer-assistance representatives are available to assist you in answering questions related to FedMall order and shipping status, FedMall password reset, and Supply Discrepancy Reports (SDR) to name a few.
